

HOMEOWNERSHIP:

7 Important Things Home Sellers Often Forget to Do

1

Google your address to find out what your online listing looks like and to see what is being said about your property on the Internet.

2

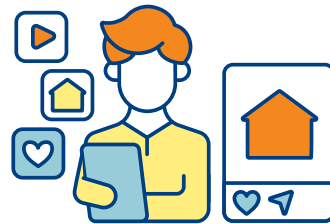

Account for improvements that have been made and remaining issues with the property.

3

Check your real estate agent's references to make sure he or she is a good fit.

4

Insist on social media marketing.

5

Make sure the doorbell rings and make any other needed cosmetic repairs.

6

Clean inside everything because buyers will look in closets, cabinets, etc.

7

Clarify which items are not included in the sale.
